UNIVERSITY AT CAMBRIDGE, OR HARVARD COLLEGE.

The General Court of the Colony of Massachusetts Bay, in Sept. 1636, appropriated £400 for a School or College within the Government; and appointed and named six Magistrates, and six Elders to order the College. In 1637, they voted that the College should be erected at Newtown. In the year following, they changed the name of Newtown to Cambridge, and in March, 1638—9 enacted that the College to be built at Cambridge, should be called Harvard College, in honour of the Rev. John Harvard, who had bequeathed to it £779:17:2 with his library. In the year 1642, the General Court established the Board of Overseers, to consist of the Governor, Deputy-Governor, for the time being, all the Magistrates of the jurisdiction, with the teaching Elders of the six next adjoining towns; who were invested with power to make statutes and laws for the government of the College, and to dispose and manage its funds.

In May, 1650, the Charter of the Corporation was

granted; said Corporation to consist of a President, five Fellows and a Treasurer, styled the President and Fellows of Harvard College. By this Charter, the Corporation, procuring the presence of the Overseers, and by their counsel and consent, have power to fill vacancies in their own body. They are authorized to receive and hold real estate not exceeding the value of £500 pr. ann. and any goods and sums of money whatsoever; and to make conclusive bargains for lands and tenements, &c. They are to choose and remove officers, and make orders and by-laws for the carrying on the work of the College; provided the said orders be allowed by the Overseers. By an act of the Court in 1657, called an Appendix to the Charter, the acts of the President and Fellows have immediate force and effect; they being responsible for the same to the Overseers. The Constitution of the Commonwealth recognizes and confirms the powers of the Corporation and Overseers of Harvard College or the University in Cambridge, pointing out the successors to the former Overseers, and reserving to the Legislature of the State such control over the government of the College, as was possessed by the Legislature of the late Province.

Convention of the Congregational Ministers in the Commonwealth of Massachusetts.

THEIR Meeting is held in Boston, in the afternoon of the last Wednesday in May, (or day of Election) annually; and on the following day at noon, after transacting the usual business of the Convention, a sermon is delivered in public before them, and a collection made for the charitable purpose of relieving the indigent widows of deceased Clergymen.

The Convention is a voluntary Association, embracing all the Congregational Clergy of the Commonwealth, but vested with no particular authority or control over the Churches.

The Rev. President Appleton, D. D. is chosen to deliver the next Convention Sermon. In case of failure, the Rev. Charles Stearns, D. D. of Lincoln, will officiate in his stead.

The Standing Committee of Convention, appointed for the purpose of certifying to the character of Ministers and Candidates who may travel into other States, consists of the following Clergymen, viz.

Steph. West, D. D. <i>Stockbr.</i>	John Lathrop, D. D. <i>Boston</i>
J. Lathrop, D. D. <i>W. Springf.</i>	Jed. Morse, D. D. <i>Charlest.</i>
Jos. Lyman, D. D. <i>Hatfield</i>	Ezra Weld, <i>Braintree</i>
R. Newton, D. D. <i>Greenfield</i>	John Reed, D. D. <i>Bridgew.</i>
Ino. Cushing, <i>Ashburnham</i>	Zeph. Willis, <i>Kingston</i>
Ezra Ripley, <i>Concord</i>	Thos. Barnard, D. D. <i>Salem</i>
Daniel Chaplin, <i>Groton</i>	Saml. Spring, D. D. <i>Newb'pt.</i>
Ephr. Ward, <i>Brookfield</i>	Saml. Dean, D. D. <i>Portland</i>
Charles Lowell, A. M. of Boston, Treasurer.	
John Pierce, A. M. of Brookline, Scribe of the Convention.	

The Convention earnestly recommend to all young gentlemen who design to devote themselves to the work of the ministry, to spend that portion of time in the study of divinity which learned and judicious advisers shall think necessary to qualify them for public teachers.

The General Association in Massachusetts.

THIS body was organized in June, 1805. In 1811, it consisted of Delegates from eleven Associations in Massachusetts Proper. Its members "admit, as articles of faith, the doctrines of Christianity, as they are generally expressed in the Assembly's Shorter Catechism," and consider these doctrines, which have been generally embraced by the Churches of New-England, "as the *basis of their Union*." This body wholly disclaims ecclesiastical power or authority over the Churches, or the opinions of individuals. Their essential objects, as expressed in their Constitution, are, "to promote brotherly intercourse and harmony, and their mutual animation, assistance and usefulness as ministers of Christ; to obtain religious information relative to the state of their particular churches, and of the general state of the Christian Church in this country and throughout the Christian world; and to co-operate with other similar institutions in the most eligible measures for building up the cause of truth and holiness."

This Association sends Delegates to, and receives Delegates from, the following ecclesiastical bodies, viz. The General Assembly of the Presbyterian Church in the United States. The General Associations of Connecticut and New-Hampshire. And the General Convention of Vermont.  The meetings of this body are annually on the last Wednesdays in June.

Rev ENOCH HALE, of West-Hampton, is the standing Scribe of this Association.

Summary of the method of Treatment to be used with Persons apparently dead from Drowning, &c.

The RESUSCITATIVE PROCESS, recommended by the Humane Society.

CONVEY the person to the nearest convenient house, with his head raised; strip and dry him as quick as possible: clean the mouth and nostrils from froth and mud. If a child, let him be placed between two persons naked, in a hot bed. If an adult, lay him on a hot blanket or bed, and in cold weather, near a fire; in warm weather, the air should be freely admitted into the room. The body is next to be gently rubbed with warm woollen cloths, sprinkled with spirits, if at hand, otherwise dry. A heated warming-pan may be now lightly moved over the back, properly covered with a blanket; and the body, if of a child, is to be gently shook every few minutes. Whilst these means are using, let a clyster of warm water, with as much common salt as it will dissolve, be thrown into the bowels. Bathe the breast with hot rum; and persist in the use of these means for several hours. If no signs of life should then appear, let the body be kept warm several hours longer, with hot bricks, or vessels of hot water, applied to the palms of the hands and soles of the feet; and this for a longer or shorter time, as the circumstances of the case may dictate.

The too customary method of rolling on a barrel, sus-

pending by the feet, and every violent mode of agitation, particularly in removing the body from the water, should be most carefully avoided.

To restore breathing, introduce the pipe of a bellows (when no apparatus is at hand) into one of the nostrils, the other and mouth being closed; *inflate the lungs*, until the breast is a little raised; mouth and nostrils must then be let free. Repeat this process until life appear.

Electricity is recommended to be early employed by judicious practitioners.

General Observations.—*Resuscitation.*

On the *dawn* or first indication of returning life, the prudent practitioner will resign the office of *Art* to *Nature*. It is evident that *Art* has contributed her share, by enabling *Nature* to struggle with the immediate cause of oppression. It is in fact this judicious blending of *Nature* with *Art* that gives to the latter all its efficacy.

On signs of returning life,

A tea-spoonful of warm water may be given; and if swallowing be returned, warm wine or diluted brandy. The patients must be laid in a warm bed, and if disposed to sleep, they will generally awake perfectly restored.

The plans above recommended are to be used three or four hours. It is an absurd and vulgar opinion, to suppose persons irrecoverable, because life does not soon make its appearance.

⚡ Bleeding never to be employed, unless by the direction of a Physician.

It is divided into two counties ; the county of Washington on the north side of the Potomac ; and the county of Alexandria on the south side. In the former, the laws of Maryland are continued in force ; in the latter, those of Virginia. Congress, however, makes what laws it pleases for both.

Washington city is built on the Maryland side of the Potomac, on a point of land between what is called the Eastern branch and the Potomac. Its plan, as laid out, extends nearly four miles up each of those rivers. The Eastern Branch forms a safe and commodious harbour, being sufficiently deep for the largest ships, for about four miles above its mouth, while the channel lies close along the bank adjoining the city, and affords a large and convenient harbour. The capitol is situated on a

pleasant eminence, commanding a view of every part of the city, and of a considerable portion of the country around. The President's house stands on a rising ground, possessing a water prospect, together with a view of the capitol, and the most material parts of the city. Such streets as lead immediately to public places are from 130 to 160 feet wide ; others from 90 to 110. The President's house is 170 by 85 feet, two stories high. It is built of free white stone. This city became the permanent seat of the National Government in 1800.

INDIANA TERRITORY,

Containing 24,520 inhabitants, is divided into four counties, and 27 townships. Its average length is about 270 miles, and its average breadth about 130. Number of square miles, 35,000. The officers of this government are appointed by the President of the U. States. Vincennes is the capital and the seat of government, and is also the centre of commerce.

MICHIGAN TERRITORY.

This Territory is divided into four districts, viz.—Erie, Detroit, Huron, and Michillimakinak. Its greatest length, from South-east to North-west, is 500 miles ; from North-east to South-west it is 300. The number of square miles, both of land and water, is estimated at 150,000. The legislative power is vested in a Governor and a Supreme Court, composed of three Judges, all appointed by the President of the United States. The executive power is vested in the Governor, and the judicial in the three Judges, and such Civil magistrates in the various districts as the Governor shall appoint.

ILLINOIS TERRITORY.

This is the western half of what was formerly called the Territory N. W. of the Ohio, and embraces the whole of it, except what is included in the State of Ohio, and the Territories of Michigan and Indiana. The whole tract contains about 200,000 square miles. It was a part of the Indiana Territory till 1809, when it was erected into a separate Government. Population in 1810, was 12,282 inhabitants.

The Territory originally included in Louisiana, was estimated to contain nearly a million of square miles ; as large an extent of country as the whole of the residue of the United States. In 1810, it contained 97,401 inhabitants.
